

Task-3 Report-Lecture Slides Generation

What prompts were used

Prompt-1

Help me understand this lecture fully. And then generate slides

Prompt-2

Help me learn this lecture completely by explaining each concept described in the lecture. Then generate ppt of this lecture

Prompt-3

Help me learn each concept described in the lecture Use only the content from this lecture and generate visually appealing ppt

Prompt-4

Create ppt using the transcript I pasted

The slides should be from the transcript only

Prompt-5

Don't you think you missed some important content from transcript check it again

Add graphics and visual elements in slides you created

Prompt-7 Final Prompt

Use this video transcript file and generate slides from this lecture

Which prompts worked effectively

Prompt -4 ,5 and 6 worked quite better than others

Which prompts did not work well

Prompt-1 Gives very basic idea about the lecture but failed to explain the lecture.

Prompt-2 just picks basic ideas like the lecture is about agents but explains everything from outside sources.

Prompt-3 generated very basic slides

How the prompts were refined

- I changed the wording from understanding to explain every concept of lecture.
- Give it the context I needed.

- Asked it to recheck what it created
- Set the limits to stay focused on the video link only.
- At last, I copied the video transcript into a word file and gave that file to claude

Which AI tools/models were used:

- Chatgpt: Failed It stated “I can't reliably access the actual video content from that YouTube link alone”
- Deepseek: Failed It stated “I’m unable to access or view the specific content of the YouTube video you linked”
- Gemini created the slides but added too basic information.
- Claude: Failed with video link It Stated “Unfortunately, I wasn't able to directly access or retrieve the content of that YouTube video — YouTube blocks automated fetching, and my search didn't return results identifying the specific lecture at that video ID”
BUT final slides were created using claude
Claude worked with the transcript and gave a pretty good ppt
